Company

Engineering Motion Since 2003

Founded in 2003, Turkas Gas Springs has grown into one of Türkiye's leading manufacturers of high-performance gas springs, dampers, and motion control solutions for global industries.

Built on the extensive sector expertise of our founder, Mr. Refik Öztüfekçi, Turkas combines decades of know-how with a forward-looking manufacturing mindset focused on precision, consistency, and customer partnership.

From raw material processing to final assembly, testing, packaging, and international shipment, every stage of production is managed under strict quality control standards at our modern manufacturing facility in Bursa, Türkiye.

More Than a Supplier — A Development Partner

At Turkas, we believe successful projects begin with collaboration. Our engineering and commercial teams work closely with customers to develop products fully adapted to technical requirements, market expectations, and operating environments.

Whether the need is high durability, corrosion resistance, temperature stability, special force curves, or customized dimensions, we transform customer demands into reliable engineered solutions.

Quality

Quality Without Compromise

At Turkas, quality is not a department — it is a company-wide discipline embedded in every process, every product, and every decision we make.

Our mission is to deliver products that meet the highest standards of safety, durability, consistency, and performance.

Quality Begins With Engineering

Every successful product starts with precise design and technical validation.

Our R&D and engineering teams develop solutions according to customer requirements, operating conditions, and international quality expectations.

Continuous Improvement Culture

Turkas is committed to continuous improvement through employee training, process development, investment in technology, and customer feedback integration.

Our goal is simple:

To deliver zero-defect products and long-term confidence to every customer we serve.

Why us?

Proven Experience

With engineering expertise dating back to the 1980s, **we embrace next-generation solutions.**

Dedicated Team

Our professional sales and quality teams provide fast and reliable support for you over a 2-year period.

On-Time Delivery

For standard orders, your products are produced and shipped within 5 weeks.
